- Excella Consulting, Arlington VA
- Lead of Excella's Java Center of Excellence

Excella is Hiring!

The screenshot shows a web browser window with the URL www.excella.com/careers/javajvm-languages-developer.aspx. The page features the Excella Consulting logo on the left, a navigation menu with links for ABOUT US, SERVICES, PEOPLE, PERSPECTIVES, CASE STUDIES, and CAREERS, and a search bar with the text "CONTACT US". The main content area is titled "Java/JVM Languages Developer" and includes a paragraph describing the search for experienced, analytical thinkers. Below this, there are two columns of bulleted lists of technologies and tools. A photograph of a man with his arms crossed is on the left side of the main content area. At the bottom, there is a link to submit a resume.

ABOUT US SERVICES PEOPLE PERSPECTIVES CASE STUDIES CAREERS

Java/JVM Languages Developer

We are currently looking for experienced, analytical thinkers with great business and technology skills. The ideal candidate is a great communicator and is interested in working with small agile teams to deliver mission critical applications using and learning a diverse mix of the following Java Virtual Machine (JVM) technologies:

- Groovy, Scala, Clojure, Ruby/JRuby
- Python/Jython
- Spring MVC, Struts 2, Google Web Toolkit, Grails
- Spring 3, EJB3
- HTML, Dojo, JQuery, ExtJS
- Ant+Ivy, Maven, Gradle
- Subversion, Git, Mercurial
- Jenkins/Hudson, Sonar, Nexus
- Tomcat, JBoss, WebSphere, WebLogic
- Oracle, DB2, MySQL, PostgreSQL
- JPA, Hibernate, iBaTis

To submit your resume now, click [here](#).

Continuous Delivery is...

...a set of practices and principles aimed at, building, testing, and releasing software faster and more frequently.

Continuous what?

The image shows four wrenches of various brands and sizes arranged horizontally on a wooden surface. The top wrench is a Kawasaki 14-17 combination wrench. The second wrench is an Armstrong 5/8 inch Armaloy combination wrench. The third wrench is a small Eisemann and Reim-Wagner combination wrench. The bottom wrench is a J.S.B. 11/16-13/16 combination wrench. The word 'Developers' is overlaid in the center of the image.

```
TemperatureTest.java x
1  import ...
11
12  @RunWith(MockitoJUnitRunner.class)
13  public class TemperatureTest {
14
15      private Temperature temp;
16      @Mock private WeatherService service;
17
18      @Before public void setUp () {
19          Temperature temp = new Temperature();
20          temp.setWeatherService(service);
21      }
22
23      @Test public void canRetrieveCurrentTemp () {
24          when(service.getTemp()).thenReturn(78);
25          assertThat(temp.currentTemp(), is(equalTo(78)));
26      }
```

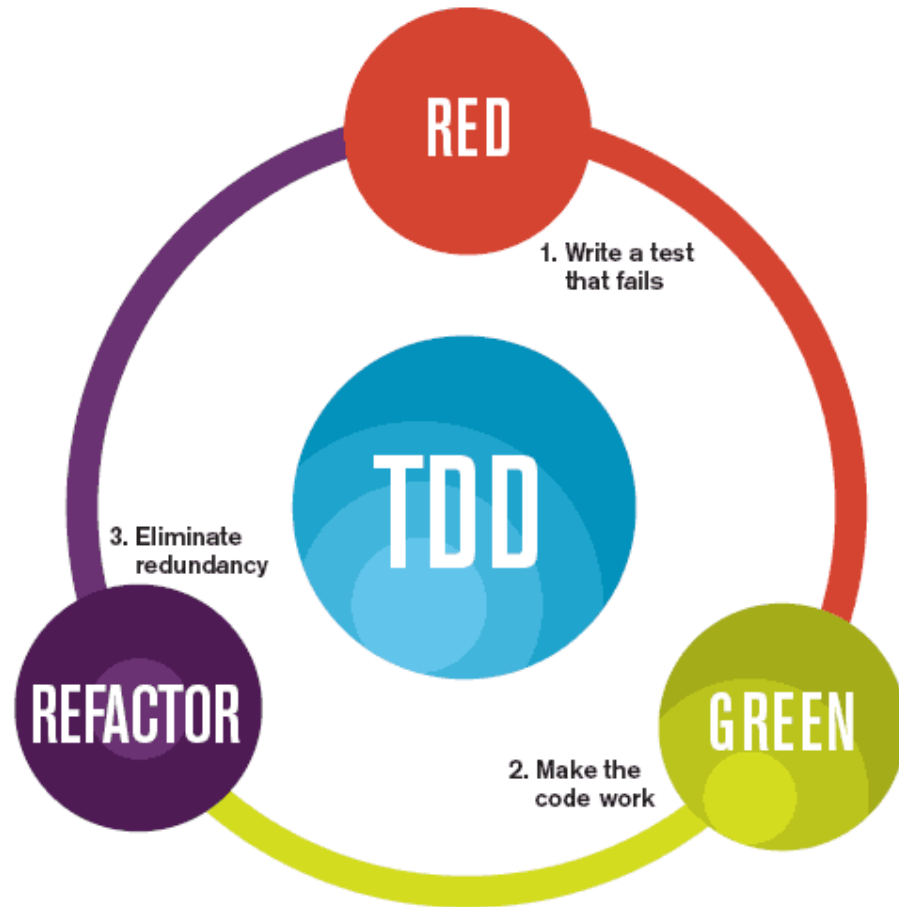

spock

the enterprise ready specification framework

Spock

```
TemperatureTestSpec.groovy x
1  class TemperatureTestSpec {
2
3      def temperature = new Temperature()
4      def mockWeatherService = Mock(WeatherService)
5
6      def setUp() {
7          temperature.weatherService = mockWeatherService
8      }
9
10     def "can retrieve current temperature" () {
11         given: "the current temperature is 78"
12         mockWeatherService.getTemp() >> 78
13
14         when: "requesting the current temperature"
15         def temp = temperature.currentTemp()
16
17         then: "the weather service returns 78 degrees"
18         temp == 78
19     }
20 }
```

What is in a name? Usually a version number, actually.

July 7, 2011 jamesbetteley

Go to comments Leave a comment

Another fascinating topic for you – build versioning! Ok, fun it might not be, but it is important and mostly unavoidable. In an [earlier blog](#) I outlined proposing to use with our Java builds. Since then, I tend to, and so I've had to change the versioning.

Essentially, what I'm after is a way of using artifact at-a-glance information about the artifact I have a number to meet their expectations – that is, when

Axel Fontaine

Software Development Expert

23 JANUARY 2011

Maven Releases on Steroids: Adios Release Plugin!

One of the central themes of my current series of talks about Continuous Delivery is **releasing software**.

Releasing software encompasses a number of activities such as

- Picking a version number
- Checking out the latest revision from SCM
- Building and Testing binaries
- Tagging the SCM revision with the version number
- Publishing the binary artifacts in an Artifact Repository
- Writing release notes, announcement e-mails, etc...
